## **DETAILED ACTION**

This application filed September 20, 2002, is a 371 national stage filing of PCT/US00/25090, filed September 14, 2000.

Claim 1-50 are pending.

## Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15, 17, drawn to a method of producing an unmodified embryonic or stem cell.

Group II, claim(s) 1, 2, 16, 32-45, drawn to a method of producing a modified embryonic or stem like cell.

Group III, claim(s) 18-23, drawn to embryonic or stem like cells.

Group IV, claim(s) 24, 25 and 31, drawn to differentiated cells.

Group V, claim(s) 26-30, drawn to methods of therapy comprising administering cells.

Group VI, claim(s) 46-50, drawn to a somatic cell that expresses a marker.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features because the products of stem cells, differentiated cells and somatic cells

Application/Control Number: 10/070,719

Art Unit: 1632

comprising transgene, and methods of administering cells for therapy (for example bone marrow transplantation) were all known in the prior art. Under PCT Rule 13.2, they lack the same or corresponding special technical feature because invention has no special technical feature that defined the contribution over the prior art. Further, it is noted that unity of invention between different categories of inventions will only be found to exist if specific combinations of inventions are present. Those combinations include:

- 1) A product and a special process of manufacture of said product.
- 2) A product and a process of use of said product.
- 3) A product, a special process of manufacture of said product, and a process of use of said product.
  - 4) A process and an apparatus specially designed to carry out said process.
- 5) A product, a special process of manufacture of said product, and an apparatus specially designed to carry out said process.

In this case, the claimed inventions fail to meet either criteria. The allowed combinations do not include multiple products, multiple methods of using said products, and methods of making multiple products as claimed in the instant application, see MPEP § 1850.

Applicant's claims encompass multiple inventions and do not have a special technical feature which link the inventions one to the other, and lack unity of invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1632

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph Woitach whose telephone number is (571) 272-0739.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ram Shukla, can be reached at (571) 272-0735.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group analyst Dianiece Jacobs whose telephone number is (571) 272-0532.

Joseph T. Woitach
